© 1996-2014, Amazon.com, Inc. or its affiliates This book can be a custom edition, available only through your bookstore. Save money by looking for another book above! LAST BEST PRICES Year: 2008 Edition: 5th Publisher: Prentice Hall Type: Paperback ISBN13: 978013514764 ISBN: 013514776X Year: 2008 Edition: 6th Publisher: Prentice Hall Type: Spiral-bound ISBN13: 97801350005538 ISBN: 0135005531 Year: 2007 Edition: 6th Publisher: Allyn and Bacon Type: Paperback ISBN13: 97802055541614 ISBN: 0205541615 © 1996-2014, Amazon.com, Inc. or its affiliates NOTE: Before buying, contact your instructor to make sure you choose the right ISBN. For each headline, there are several MyLab™ and Mastering platforms, and non-transfer registration. To sign up and use MyLab or Mastering, you may also need a course ID that your instructor will provide. Used books, rentals and purchases made outside of Pearson If purchased or rented from companies other than Pearson, access codes for the MyLab or Mastering platform may not be included, may be incorrect or may be previously redeemed. Proconst with the seller before you complete the purchase. Available for Autumn 2020 classesThe DIGITAL UPDATE gives you revised content and resources that keep your course ongoing For 3rd to 4th semester courses covering one variable and multivariate calculus accepted by students of mathematics, engineering, science, or economics. This package includes an 18-week access card for MyLab Math. The most successful new calculus text of the past two decades is the long-awaited third edition of The Briggs Calculus: Early Transcendentals retain their distinctive features by implementing important achievements and refinements. Briggs, Cochran, Gillett and Schultz build from the foundation of carefully crafted sets of exercises and then engage students in a narrative through writing that reflects the instructor's voice. Examples come out and are thoughtfully annotated, and the numbers are meant to be learning, not just to complement the narrative. The innovative e-book contains about 700 interactive figures that can be manipulated to shed light on key concepts. For the 3rd edition, the authors synthesized reviews of text and MyLab™ Math content from more than 140 instructors. This thorough and extensive review process, coupled with the authors' own teaching experience, helped create a text that is intended for today's calculus teachers and students. Personalize your training with MyLab Math by combining trusted author's content with digital tools and a flexible platform, MyLab Math personalizes learning experience and improves results for each student.0136207685 / 97801362076689 CALCULUS, EARLY TRANSCENDENTALS PLUS MYLAB WITH PEARSON ETEXT - 18-WEEK ACCESS CARD PACKAGE, 3/1. Features1.1 Feature Review1.2 Feature Presentation1.3 Reverse, Exponential and Features1.4 Trigonometry Features and Their Reverse ExercisesReview2. ExerciseReview2. Idea Limits2.2 Definitions of Limits2.3 Methods for Calculating Limits2.4 Infinite Limits2.5 Limits on Infinity2.6 Continuity2.7 Accurate Definitions of LimitsReview Exercises3. Derivatives3.1 Introduction of Derivatives3.2 Derivative as a Function3.3 Rules of Differentiation3.4 Product Rules and Odds3.5 Derivative Trigonometry Functions3.6 Derivatives as Betting Change3.5 7 Rule Chain3.8 Implicit differentiation3.9 Derivative logarithmic and exponential functions3.10 Derivative reverse trigonometry functions3.11 Related RatesReview Exercises4. Derivative4.1 Maxima and Minima4.2 Medium Theorem4.3 What derivatives tell us4.4 Graphic Features4.5 Problem Optimization4.6 Linear App and Differentials4.7 Rule L'Hôpital4.8 Newton Method4.9 AntiderivativesReview Exercises5. Integration5.1 Approaching areas under curves5.2 Certain integrals5.3 Fundamental calculus theorem5.4 Work with integrals5.5 Replacing The Review Exercise Rule6. Integration6.1 Speed and Pure Change6.2 Regions Between Curves6.3 Volume slicing6.4 Volume shells6.5 Length Curves6.6 Surface Area6.7 Physical Exercise Apps7. Logarithmic, exponential and hyperbolic functions7.1 Logarithmic and exponential functions are revised7.2 Exponential Models7.3 Hyperbolic FeaturesReview Exercise8. Integration Methods8.1 Key Approaches8.2 Integration by Parts8.3 Trigonometry Integrals8.4 Trigonometry Replacement8.5 Partial Fractions8.6 Integration Strategies8.7 Other Integration Methods8.8 Numerical Integration8.9 Irregular IntegralsReview9 Exercises. Differential Equations9.1 Basic Ideas9.2 Field Direction and The Euler9.3 Separate Differential Equations9.4 Special First Order linear differential equations9.5 Modeling with differential equationsReview Exercise10. Sequences and Infinite Series10.1 Review10.2 Sequences10.3 Infinite Series10.4 Divergence and Integral Tests10.5 Comparison Tests10.6 Alternating Series10.7 Coefficient and Root Tests10.8 Convergence Choice Choice TestReview Exercise11. Power Series11.1 Approaching Features with Polynomials11.2 Properties Power Series11.3 Taylor Series11.4 Working with Taylor SeriesReview Exercise12. Parametric and Polar Curves12.1 Parametric Equations12.2 Polar Coordinates12.3 Calculus in Polar Coordinates12.4 Conical SectionsReview Exercise13. Vectors and geometry of space13.1 Vectors in plane13.2 Vectors in three dimensions13.3 Dot Products13.4 Cross Products13.5 Lines and aircraft in Space13.6 Cylinders and quadric surfacesReview Exercise14. Vector-estimated functions14.1 Vector-estimated functions14.2 Calculating vector-valuable functions14.3 Movement in space14.4 Curve length14.5 Curves and Normal VectorsReview Exercise15. Multiple variables15.1 Charts and Level Curves15.2 Limits and Continuity15.3 Partial Derivatives15.4 chain15.5 Directed derivatives and Tangent planes and linear approximation15.7 Maximum/Minimum Problems15.8 Lagrange MultipliersReview Exercise16. Multiple integration16.1 Double integrals over rectangular regions16.2 Double integrals over common regions16.3 Double integrals in polar coordinates16.4 Triple integrals16.5 Triple integrals in cylindrical and spherical coordinates16.6 Integrals for mass calculations16.7 Change of variables in several integrated exercises. Vector Calculus17.1 Vector Fields17.2 Line Integral17.3 Conservative Vector Fields17.4 Green Theorem17.5 Divergence and Curl17.6 Surface Integrals17.7 Stokes Theorem17.8 Divergence Theorem ExerciseD 2 Differential Equations of the Second Order ONLINED2.1 Basic IdeasD2.2 Linear homogeneous equationsD2.3 Linear heterogeneous equationsD2.4 ApplicationsD2.5 Comprehensive functionsAppendix ExercisesAppendix A. Evidence of the selected TheoremAppendix B. Algebra Review ONLINEAppendix C. Complex numbers ONLINEAnswersIndexTable Integrals 4th edition by Colin Adams, John Rogawski 2nd edition cannon, Rogawski 4th edition of Colin Adams, John Rogawski, ... 3rd edition of Rogawski 2nd edition of John Rogawski, Ray Cannon Cannon
