I mean, there are so many!!! Each focuses on different methods, strategies or aspects of trading. He has one DVD on the Biotech trade. Another DVD on the SEC. Other DVDs on shortening. How do you know which one is the best and if that's even good? I'm going to cut through all the confusion and get straight to it. The best DVD to date from Tim Sykes is how to make millions. If you are on the fence and are unsure whether to sign up with Tim, this is the only product I would recommend you get. You will get all the strategies and answers you need to start trading successfully. What You Get -How to Enter Orders -Best Brokers to Use -Best Software Tools and Research Websites -Lessons on Trading Vocabulary -Stock Trading Patterns-When Not Trading -Position Size -Position -Cutting -Planning Out Your Trades - How to Grow Small Accounts Exponentially, Why Is It Really The Best DVD If You've Been on My Site a Lot, You Know, The Biggest Complaint I Have Against Tim is that he's a terrible teacher. He doesn't always answer your questions and spends more time promoting his products than learning his strategies. With How to Make Millions, this problem goes away for one simple reason: Tim is not one who does most of the learning. In this DVD, Tim collected half a dozen traders who made over \$1 million, including my personal favorite, Superman. This means that you don't have to listen to Tim Drone with all his BS marketing. You can hear from some elite, one in his traders on how they do it. This includes both his millionaire students as well as some of the other Gurus. The best part is take a look at this Youtube comment on one of Tim's videos. I wonder if Tim will show the huge amount of money he makes from students. It's part of what most people are fixated on. Tim Sykes How to Make Millions is a free download for PcTim Sykes BooksTim charges a hefty fee to teach you the strategies it uses to be successful in the stock market. I see some serious problems with this argument. 1) This is America, and it is everyone's right to pursue wealth. No one complains that McDonalds is charging you money for food, but they expect Tim to give his Big Mac recipe away for free. 2) People willingly pay to go to college to learn the same stuff. Learn from the best. In due course. Get Unlimited Access for Life.
